EXPLORING THE JAMBOREE: ONE ACTIVITY AT A TIME

Sustainable Developmental Goals Hub

The sustainable development goals hub of the jamboreette was inclined towards equipping young people with knowledge and requisite awareness on the seventeen goals which was further grouped into four areas based on the impact generated on the society. The objective of the hub was to interact with young people and understand their perspective on the varied goals

while identifying local issues and relevant circumstances where they will be able to take action. Creating a platform for sharing innovative ideas and implementable solutions for young people to disseminate in their communities was the foundational pillar of the hub. Providing guidance on translating plans into actions was

a observed impact across the participants.

The People area focused on no poverty, zero hunger, good health and well-being, quality education and gender equality. The Peace and Partnerships area primarily focused on building peace, justice and strong institutions while highlighting the importance of partnerships for the goals.

The Prosperity area emphasised on balance between development and evolving needs of people with focus on affordable and clean energy, decent work and economic growth, industry, innovation and infrastructure, reduced inequalities and sustainable cities and communities.

The last area was Planet which reiterated on the commitment towards creating a better world through actions revolving around climate action, clean water and sanitation, responsible consumption and production, life of land and life below water.

The Scouts for SDGs framework was clearly explained and mapped to the proficiency badge program of the Bharat Scouts and Guides. Details associated with updation of projects and blog posts on the SDG Hub platform were made available to the participants for them to secure additional information and upload content to share with scouts from across the globe. The background for association of scouts with sustainability helped young people understand the relevance and significance of scouting activities.

The Global Goals for Sustainable Development

The Theme: Let's Grow with the Nature

The theme of the jamborette involved special focus to the thematic areas of environment and sustainability alongside peace and community engagement which further saw form as the Earth Tribe and Messengers of Peace initiatives of world scouting.

The Scouts of the World Award was elucidated with reference to the process of initiating work to the method of content updation and evaluation. The varied requirements for achieving the award alongside the designated timelines and the thematic areas of work were described to all the participants.

Lastly, the same was further connected with the Patrimonto badge under the banner of Messengers of Peace initiative which provided insights into cultural and heritage awareness and conservation in specific. The partnership with UNESCO and the importance of world heritage sites was communicated through suitable examples and further involved an activity of identifying sites across varied parts of the state and country. The Earth Tribe Initiative was a separate station where young people were able to comprehend the foundational purpose of the initiative alongside reasoning the use of the word tribe. The cy-

cle of work was explained through an activity for the young people.

The Champions for Nature challenge badge was highlighted for its work associated with conserving the wildlife habitats and rejuvenating natural resources while encouraging young scouts and guides to rethink their lifestyle choices for maximising their contribution towards sustainable development goals. The Plastic Tide Turners challenge badge helped communicate the profound negative impact generated as a result of single use plastic while helping young people identify alternatives in general. Lastly, theoretical information on the Scouts Go Solar challenge badge

was made available while showcasing the effectiveness of switching energy supply to renewable sources and its application within scouting.

The background and significance of the Messengers of Peace initiative helped underline the importance of peace in today's world and encouraged young people to actively engage with others in the language of peace. The dialogue zone game was an activity which helped young people identify their boundaries for conversations and developing a perspective on the method of communication based on the context of the circumstances. The Dialogue for Peace challenge badge was discussed in detail alongside helping scouts and guides inculcate the ten principles of dialogue in specific.

The WAGGS station focused on surfing smart in the era of digitalisation while issuing some best practices that could be employed by young people for ensuring their digital safety. The concept

of Free Being Me was explained with appropriate age-related examples while helping build confidence among the participants while respecting themselves for their actual self. An activity of

confidence walk and expressing their confidence traits was undertaken by the volunteers which in turn added immense value and setting the tone for subsequent activities. Details on the Sangam World Centre was made available for the participants with the anticipation of their active engagement in subsequent events scheduled ahead. The HAM Radio station provided in-depth insight into the evolution of communication and the use of radio waves for boosting scouting engagement through activities like the JOTA-JOTI. The various types of devices, the licensing

requirements and operational model was displayed for better visual understanding of the participants. The morse codes and relevance of using radio waves despite advancements in technology was projected to the young people while encouraging them to complete training courses and secure licenses to interact with people from across the globe and assisting extraordinary calamities through timely communication and updates. The use of radio for scouting activities was listed with examples which could further be used to enhance the engagement of young people.

THE VIBRANT EXHIBITION AREA: THE

The exhibition area of the jamborette is strategically located opposite to the main stage with the objective of maximising its reach and enhancing its relevance while being conveniently accessible to all the participants throughout the day. Everyone is encouraged to pay a visit and

engage in the exhibition, especially during break times to visit the differentiated external exhibitors and secure knowledge beyond scouting in general. The external exhibitors include but are not limited to educational institutions, government departments, skill development organisa-

tions and public welfare movements which can equip and make aware the social reality to the attendees while providing information on creative skill sets that be acquired during the course of the jamborette.

AGRICULTURAL MINISTRY EXHIBITION STALL

The stall is being powered by the agricultural ministry staff of the Belagavi District who are providing detailed insights into the cropping pattern of the region which is aligned with natural factors like water availability, soil distribution and characteristics, topographic mapping, and climate feasibility to name a few. The information being disseminated to the participants revolve around the sustainable agricultural practices that are being employed by the farming community causing mutual benefaction to the productivity and environment conservation in specific. The same is being mapped to various sustainable development goals and underlining the impact of agriculture towards creating a better world.

The progressive schemes connected with agriculture were explained to help generate an understanding of the benefits and infrastructural amenities that are made available for supporting farmers in the region. The concepts of quality seed selection, techniques for water management, natural approaches to maintain soil fertility and use of mechanisation for faster and efficient farm management were clearly communicated at the stall. Finally, the cropping cycle was discussed to help understand the steps, processes and timelines connected to varied crops in general. The stall serves as an important link between agriculture and young people within the jamborette.

EDUCATIONAL PROGRAM AND OFFERINGS EXHIBITION STALL

The stalk in turn delivers the environment education programme developed by the Environmental Management and Policy Research Institute constituting the Department of Forest, Ecology and Environment, Government of Karnataka. The programme is dedicated to educating and empowering young people to influence positive lifestyle changes that can in turn trigger a considerable impact on their contribution towards environmental sustainability while enhancing their commitment towards the same. The stall primarily explains the ecosystem and the chain of interdependence for existence which serves as the base for highlighting the importance of ecological balance.

The habits being imbibed through the programme include reducing waste generation with special emphasis on cutting down on single-use plastic. Additionally, conserving scarce water resources which are deemed inalienable for survival of living species and saving energy through reducing consumption and utilising alternative sources, mainly renewable energy generation tools. Lastly, the stall emphasised on maintaining the existing forest and green cover while reiterating the need for rehabilitation of lost habitat and making a promise to plant native trees and plants in available spaces to contribute towards reducing pollution in general.

Special Recognition

The service volunteers were recognised for their services including cleanliness, physical arrangements and painting at the arena, that were organised during the course of the day in a special ceremony spearheaded by Gajanana Mannikeri, District Chief Commissioner, Belagavi District. The awards were sponsored by Jain Heritage School, Belagavi who recognised the efforts and talent of the participants. Around 60 participants were recognised.

ZONE FOR LEARNING AND EXPLORING

YUVA AAPAD MITRA EXHIBITION STALL

The Yuva Aapad Mitra exhibition is a coordinated effort of the volunteers belonging to the National Disaster Management Authority and State Disaster Management Authority. The stall provides detailed insights into the Yuva Aapad Mitra program associated with the Bharat Scouts and Guides in which there is a target to train 50000 young people across all districts and states in the domain of disaster response and preparedness. It underlines the commitment of scouts and guides to become first responders to natural disasters and offer assistance to authorities to minimise destruction and prevent loss of life in the event of calamities.

The volunteers explain on the process of registration and the course that is to be attended for securing the requisite training and certification which is conducted by National Disaster Response Force. The benefits of the scheme with respect to young people and the kit made available post successful completion of the training was displayed for participants to view and learn about the basic response kit. The stall encouraged young people to register for serving the nation at challenging times while connecting the same with the core scouting and guiding principles of service before self.

ECO EXHIBITION STALL

The stall in turn delivers the environment education programme developed by the Environmental Management and Policy Research Institute constituting the Department of Forest, Ecology and Environment, Government of Karnataka. The programme is dedicated to educating and empowering young people to influence positive lifestyle changes that can in turn trigger a considerable impact on their contribution towards environmental sustainability while enhancing their commitment towards the same. The stall primarily explains the ecosystem and the chain of interdependence for existence which serves as the base for highlighting the importance of ecological balance. The habits being imbibed through the programme include reducing waste generation with special emphasis on cutting down on single-use plastic. Additionally, conserving scarce water resources which are deemed inalienable for survival of living species and saving energy through reducing consumption and utilising alternative sources, mainly renewable energy generation tools. Lastly, the stall emphasised on maintaining the existing forest and green cover while reiterating the need for rehabilitation of lost habitat and making a promise to plant native trees and plants in available spaces to contribute towards reducing pollution in general.

POTTERY EXHIBITION STALL

The stall was presented by the Central Village Pottery Institute part of the Khadi and Village Industries Commission, Ministry of Micro, Small and Medium Enterprises, Government of India. The stall traces the roots of pottery in the country while helping young people to connect with the rich cultural heritage and history of pottery in general. The stall exhibits various types of pottery for everyone to view and develop a visual understanding of the same. Live pottery making is a top attraction driven by enthusiasm and fascination for the lost art of pottery making among young people who would have minimum exposure to pottery workshops.

Volunteers explained the specific benefits of the varied types of pottery while helping understand the utility of the same and its relevance considering the climatic conditions across different geographical locations in specific. The stall encouraged the use of pottery in households while explaining its cultural and sustainability dimensions that would in turn help support rural economies while harvesting the inherent benefits of the pottery products. Interacting with the volunteers helped understand and locate the designated training institute for interested young people who can dive deeper into mastering the art of pottery. Lastly, the stall helped highlight the importance and significance of pottery to the generation of young people.
